

## GENERAL INDEX TO VOL. X.

[NOTE.—Names of Authors and participants in debate are printed in SMALL CAPS; Titles of Papers are printed in *italic type*.]

	PAGE
<i>Account of certain experiments upon several methods of counterbalancing the reciprocating parts of locomotives</i> .....	302
Air entrained by belts.....	769
Aluminium, soldering of, and welding .....	821
Ammonia refrigerating machine, performance of .....	792
Ammonia, specific heat of.....	627
Annular lid, strains in .....	32
Areas of cylinders in compound engines.....	59
Arms for pulleys, strength of .....	224
 BABCOCK, GEO. H., disc., number of meetings.....	 20
"      "      "      compound engines for manufacturing purposes....	76
"      "      "      flow of steam in a tube.....	823
"      "      "      the identification of dry steam .....	379
BALL, F. H., disc., expansion of timber due to water.....	540
"      "      "      vapors and vapor engines.....	664
"      "      "      cylinder ratios of triple expansion engines.....	583
"      "      "      improved motion device for engine indicators .....	591
"      "      "      tractive forces of leather belts.....	772
"      "      "      the distribution of steam in the Strong locomotive.....	694
BALL, SIR ROBERT, disc., overhauling of a mechanical power .....	419
BARR, W. M., disc., phenomena of steel .....	456
"      "      "      foundry cupola experience.....	94
"      "      "      cost of power in engines.....	264
"      "      "      sizes of tap drills.....	453
BEGGS, JAS., memorial notice of .....	832
Belts, tractive forces of .....	765
BILLINGS process for steel ingots ... ..	593
BINSSE, H. L., disc., diameters of cone and step pulleys.....	297
<i>Bits of engine-room experience</i> .....	693
Boilers, longitudinal riveted joints of ... ..	707
BOND, G. M., disc., sizes of tap drills .....	456
"      "      "      phenomena of steel. ....	445
BORDEN, T. J., disc., compound engines for manufacturing purposes.....	77
Boulton process for steel ingots.....	595
BOYD, JOHN T., disc., number of meetings .....	19
Brine meter.....	806
Brine, specific heat of.....	800
Bushings of steel .....	454
 Calorimeters, errors of.....	 375

	PAGE
<i>Calorimeter, A simple</i> .....	327
Cast iron, test of the strength of.....	187
Central support for Corliss engines.....	829
Chambered holes .....	462
CHENEY, W. L., A system of worm gearing of diametral pitch.....	333
CHRYSTIE, JAMES, disc., lubrication.....	810
"    "    "    electro motors for shops.....	823
"    "    "    case-hardening of steel.....	823
CLAUSIUS, R. J. E., memorial notice of.....	842
Coal consumption per horse power ....	50
Comparative cost of steam and water power .....	499
<i>Compound engines for manufacturing purposes</i> .....	48
Compound engines for manufacturing purposes, dimensions of.....	61
Cone pulleys, diameters of .....	269
Consumption of steam at various speeds.....	722
COOPER, JOHN H., On the longitudinal riveted joints of steam-boiler shells ..	707
"    "    disc., tractive forces of leather belts .....	769
"    "    "    lubrication .....	813
"    "    "    bits of engine-room experience .....	706
<i>Cornish or double-beat pump valves</i> .....	521
Cost of horse power per annum .....	55
Cost of power in non-condensing .....	233
<i>Cost of power in non-condensing steam-engines</i> .....	233
<i>Cost of steam and water power, comparative</i> .....	499
Cost of water-power plant.....	501
Cost of water horse power.....	500
COUCH, A. B., memorial notice of .....	832
Council, report of .....	6
Counterbalancing a locomotive.....	302
Counterbore in cylinders .....	698
Cracking of steel .....	434
CRANE, W. E., disc., variable load, engine speed and internal friction ....	183
"    "    "    phenomena of steel.....	437
CRANE, T. S., disc., the piping of steel ingots.....	592
"    "    "    phenomena of steel.....	437
"    "    "    worm-gearing of diametral pitch .....	336
"    "    "    friction of piston packing rings.....	397
CREELMAN, W. J., disc., bits of engine-room experience .....	704
CROMWELL'S method for cone pulleys.....	282
Crude petroleum in steam boilers.....	761
<i>Cupola experience, A foundry</i> .....	89
Curves of water consumption by the Novelty Iron Works.....	234
Cylinder diameters of marine engines ....	580
Cylinder lubrication .....	817
<i>Cylinder ratios of triple-expansion engines</i> .....	576
DAVIS, E. F. C., disc., tractive forces of leather belts.....	773
"    "    "    temperature effect on the strength of iron and steel..	718
"    "    "    gain sharing .....	622
"    "    "    bits of engine-room experience .....	706

	PAGE
DAVIS, E. F. C., disc., lubrication .....	814
DEAN, F. W., distribution of steam in a Strong locomotive .....	687
“ “ disc., phenomena of steel .....	438
DELAMATER, CORNELIUS H., memorial notice of .....	836
DENTON, J. E., performance of a 35-ton refrigerating machine of the ammonia absorption type .....	792
“ “ on the identification of dry steam .....	349
“ “ steam consumption of engines at various speeds .....	722
“ “ disc., some properties of ammonia .....	646
“ “ “ the president's address .....	493
“ “ “ tractive forces of leather belts .....	771
“ “ “ cylinder ratios of triple-expansion engines .....	584
“ “ “ the steam turbine .....	681
“ “ “ reducing section of bolts .....	819
“ “ “ compound engines for manufacturing purposes .....	75
“ “ “ some properties of vapor and vapor engines .....	657
“ “ “ cost of power in steam engines .....	255
“ “ “ diameters of cone and step pulleys .....	297
“ “ “ variable load, speed and engine friction .....	172
“ “ “ loss by friction in a transmitting dynamometer .....	518
“ “ “ on the friction of piston-packing rings in steam cylinders .....	392
“ “ “ grease for lubrication .....	811
“ “ “ tests of strength of cast iron .....	232
“ “ “ a simple calorimeter .....	331
“ “ “ joints of boiler shells .....	717
“ “ “ mechanics of the injector .....	341
“ “ “ cost of steam and water power .....	506
“ “ “ expansion of timber, due to water .....	541
“ “ “ gain sharing .....	615
“ “ “ flow of steam in a tube .....	321
<i>Diameters of cone and step pulleys .....</i>	269
<i>Diametral pitch in worm-gearing .....</i>	333
DINGEE, W. W., disc., phenomena of steel .....	435
<i>Distribution of internal friction in engines .....</i>	110
<i>Distribution of steam in the Strong locomotive .....</i>	687
DOLBEAR'S tests .....	107
DORAN, W. S., disc., lubrication .....	817
Drill driven by electromotor .....	824
<i>Dry steam, identification of .....</i>	349
“ “ “ cylinder ratios of triple-expansion engines .....	584
DURFEE, W. F., disc., number of meetings .....	22
“ “ “ friction of piston-packing rings .....	397
“ “ “ a foundry cupola experience .....	92
“ “ “ compound engines for manufacturing purposes .....	76
“ “ “ the identification of dry steam .....	381
DUTTON, C. S., disc., bits of engine-room experience .....	705
“ “ “ steam consumption of engines .....	759
“ “ “ tractive forces of leather belts .....	772
“ “ “ reducing section of bolts .....	820

	PAGE
DUTTON, C. S., disc., central support for Corliss engines .....	830
Dynamometer, calibration of .....	118
"          transmitting, friction in .....	514
"          attachment of .....	143
"          principle of the Morin .....	116
EMERY, C. E., on cost of power in non-condensing steam engine .....	233
"          "      disc., counterbalancing a locomotive .....	315
"          "      "      the identification of dry steam .....	378
Economy of various vapors in engines .....	663
<i>Electric welding</i> .....	95
Electromotors for shops .....	823
Engines, compound, for manufacturing purposes .....	48
Engines, compound, dimensions of .....	61
Engines, triple expansion .....	576
Ericsson memorial resolutions .....	473
ERICSSON, JOHN, memorial notice of .....	841
<i>Error in the "Encyclopædia Britannica"</i> .....	778
Errors of calorimeters .....	375
European trip, invitation .....	7
"          "          "      Appendix, descriptive of .....	852
Exchanges in library .....	15
Excursions, XVIIIth meeting .....	31
Exhaust steam for heat .....	52
<i>Expansion of timber due to the absorption of water</i> .....	539
<i>Experiments on counterbalancing the reciprocating parts of a locomotive</i> .....	302
EWER, R. G., disc., phenomena of steel .....	452
FAWCETT, EZRA, disc., phenomena of steel .....	437
"          "          "      Lubrication .....	816
Finance Committee, report of .....	9
FIRMSTONE, F., disc., foundry cupola experience .....	93
<i>Flow of steam in a tube</i> .....	316
<i>Formulas for saturated and superheated vapors</i> .....	670
<i>Foundry cupola experience</i> .....	89
<i>Friction of engines, distribution of internal</i> .....	110
<i>Friction of piston-packing rings in steam cylinders</i> .....	392
Friction in a mechanical power .....	402
Friction in a train of wheel-work .....	406
Friction in a transmitting dynamometer .....	514
FRITH, A. J., note on diameters of cone and step pulleys .....	297
FUCH's method for cone pulleys .....	281
FULLER, L. K., disc., phenomena of steel .....	432
<i>Gain-sharing</i> .....	600
GASKILL, HARVEY F., memorial notice of .....	833
Gauges, change of size in .....	446
Grease for lubrication .....	810
GREEN, HOWELL, discusses number of meetings .....	21
GREENHILL, A. G., discusses an error in the "Encyclopædia Britannica" .....	789

	PAGE
GREGORY, H. P., memorial notice of.....	884
GREINER & ERPE's improvement in cupolas.....	92
Gun-barrels of steel.....	447
HAMILTON, JR., ALEXANDER, memorial notice of.....	835
HARDWICK, WM., disc., lubrication.....	813
HEMENWAY, F. F., disc., lubrication.....	811
HIBBARD, H. D., disc., phenomena of steel.....	43
Hinsdale process for steel ingots.....	593
HOLLOWAY, J. F., disc., friction of piston-packing rings.....	398
"      "      "      disc., number of meetings.....	462
"      "      "      disc., number of meetings.....	22
HUNT, R. W., disc., phenomena of steel.....	447
HUSTON, C. L., disc., phenomena of steel.....	433
HUTTON, F. R., strains in an annular lid resisting internal pressure.....	32
"      "      disc., joints of boiler shells.....	714
"      "      "      compound engines for manufacturing purposes.....	75
"      "      "      number of meetings.....	26
IDÉ, A. L., disc., lubrication.....	812
Identification of dry steam.....	349
Indicators, improved device for.....	586
Ingots, piping of steel.....	592
Injector, mechanics of the.....	339
Improved motion device for engine indicators.....	586
Internal friction of engines.....	110
JACOB, A. W., improved motion device in engine indicators.....	586
JACOBUS, D. S., steam consumption of engines at various speeds.....	722
Jarvis engine.....	141
JENES, W. H., disc., temperature effect on the strength of iron and steel....	720
"      "      "      disc., an error in the "Encyclopædia Britannica".....	786
JONES, DANIEL N., memorial notice of.....	836
JONES, W. R., memorial notice of.....	838
Joints of steam-boiler shells.....	707
KENT, WM., disc., electric welding.....	104
"      "      "      mechanics of the injector.....	341
"      "      "      phenomena of steel.....	432
"      "      "      phenomena of steel.....	452
Keys and set screws, holding power of.....	224
LANZA, GAETANO, some tests of the strength of cast iron made in the Laboratory of Applied Mechanics of the Mass. Inst. Tech....	187
"      "      an account of certain experiments on several methods of counterbalancing the action of reciprocating parts of a locomotive.....	302
Lintels, cast iron, strength of.....	217
Leather belts, tractive forces of.....	765
Library Committee, report of.....	1

	PAGE
Locomotive counterbalancing.....	302
Locomotive, " <i>Sampson</i> ," the old.....	509
Lubricator, best form of.....	810
Lubricating candles.....	812
Lubrication of vertical engines.....	397
Lubrication of throttle-valve.....	396
LYNE, LEWIS F., bits of engine-room experience.....	696
"    "    "    the use of crude petroleum in steam boilers.....	761
"    "    "    disc., compound engines for manufacturing purposes.....	84
"    "    "    "    number of meetings.....	24
McFARREN, S. J., disc., electromotors for shops.....	826
"    "    "    lubrication.....	813
"    "    "    manual training in schools.....	491
"    "    "    cost of steam and water power.....	507
MAIN, C. T., on the use of compound engines for manufacturing purposes.....	48
"    "    disc., phenomena of steel.....	435
"    "    "    regulator for receiver pressure.....	70
Manganese in steel.....	447
MANNING, C. H., comparative cost of steam and water power.....	499
"    "    disc., compound engines for manufacturing purposes.....	84
MANSFIELD, A. K., disc., bits of engine-room experience.....	706
Manual training in schools, discussion on.....	491
MATTES, W. F., disc., variable load, engine speed, and internal friction.....	183
<i>Mechanical power, overhauling of</i> .....	402
Meetings, diminished number of.....	19
MILLER, T. S., disc., electromotors for shops.....	827
MILLER, WM., memorial notice of.....	833
NAGLE, A. F., Cornish double beat pump-valves.....	521
"    "    disc., tractive forces of leather belts.....	769
NASON, C. W., disc., lubrication.....	814
"    "    "    gain-sharing.....	622
"    "    "    vapors and vapor engines.....	665
"    "    "    standards.....	571
<i>Note on the steam turbine</i> .....	680
<i>Notes on the comparative loss by friction in a transmitting dynamometer</i> .....	514
Novelty Iron Works curves.....	234
NOYE, A. A., disc., reducing section of bolts.....	819
ODELL, W. H., disc., compound engines for manufacturing purposes.....	82
Oil-cup, best form of.....	810
Old locomotive, " <i>Sampson</i> ," the.....	509
<i>On the use of compound engines for manufacturing purposes</i> .....	48
<i>Overhauling of a mechanical power</i> .....	402
Packing rings, friction of.....	392
Pantagraph for high speed engines.....	591
PARKER, C. H., disc., vapors and vapor engines.....	665
"    "    "    joints of boiler shells.....	714
"    "    "    gain sharing.....	619

	PAGE
PARKER, C. H., disc., electromotors for shops .....	827
PARSONS, HENRY, memorial notice of .....	838
PEABODY, C. H., a simple calorimeter .....	327
"    "    disc., identification of dry steam .....	379
Per cent. of steam from receiver .....	64
<i>Performance of a thirty five-ton refrigerating machine of the ammonia ab-</i> <i>sorption type</i> .....	792
Petroleum in steam boilers .....	761
Photographing steam jets .....	355
PICKERING, T. R., disc., number of meetings .....	23
Piping of steel .....	438
Piston rings friction of packing rings .....	392
POPE, R. W., disc., electric welding .....	106
POWELL, S. W., a system of worm gearing of diametral pitch .....	333
<i>President's Address, 1888, The</i> .....	482
Proceedings of the (XVIIIth) Scranton Meeting .....	3
Proceedings of the (XIXth) Erie Meeting .....	409
Pulley arms, strength of .....	224
<i>Pump valves, Cornish</i> .....	521
Rack cutter .....	336
Ratios of cylinders in triple expansion engines .....	576
Reducing section of bolts .....	818
Refrigerating machine, performance of .....	792
Regulation of pressure in receiver of compound engines .....	48
Regulation of receiver pressure .....	69
Relative areas of cylinders in compound engines .....	48
Reynold's valves .....	535
RICHARDS, F. H., disc., size of tap drills .....	464
"    "    "    phenomena of steel .....	450
Rifling of gun barrels .....	448
ROBB, D. W., the old locomotive "Sampson" .....	509
ROGERS, W. S., disc., compound engines for manufacturing purposes .....	84
"    "    "    number of meetings .....	24
RUTHERFORD, L. H., the strains in an annular lid resisting internal pressure .....	32
Saturated vapors .....	670
SCHIEFFLER, F. A., a foundry cupola experience .....	89
"    "    disc., joints of boiler shells .....	717
"    "    "    lubrication .....	811
SCHUMMANN, GEO., disc., variable load, speed, and engine friction .....	182
"    "    "    friction of piston packing rings .....	395
SCRANTON, W. H., memorial notice of .....	834
SEE, HORACE, President's Address .....	482
SEE, J. W., <i>Standards</i> .....	542
Self-oiling boxes .....	810
Set screws, holding power of .....	224
Shrinkage of steel in hardening .....	437
Shrinkage of tires .....	452
Shrinkage for steel .....	452

	PAGE
<i>Simple calorimeter</i> .....	327
SMITH, C. A., <i>improved method of finding the diameters of cone and step pulleys</i> .....	269
SMITH, OBERLIN, disc., standards.....	567
“ “ “ overhauling of a mechanic power.....	419
“ “ “ the identification of dry steam.....	381
“ “ “ electric welding.....	104
“ “ “ sizes of tap drills.....	457
“ “ “ phenomena of steel.....	442
“ “ “ bits of engine-room experience.....	703
SMITH, SCOTT A., tractive force of leather belts on pulley faces.....	765
“ “ disc., central support for Corliss engines.....	830
“ “ “ lubrication.....	813
Smoke-box vacuum.....	695
SNELL, H. I., disc., a foundry cupola experience.....	90
<i>Some properties of ammonia</i> .....	627
<i>Some properties of vapor and vapor engines</i> .....	648
<i>Some tests of the strength of cast iron</i> .....	187
SPANGLER, H. W., disc., cylinder ratios of triple expansion engines.....	582
“ “ “ steam consumption of engines.....	758
Speed and load affecting friction of engines.....	138
SPRAGUE, W. W., disc., lubrication.....	811
“ “ “ the distribution of steam in the Strong locomotive.....	691
St. Louis pump valves.....	531
<i>Standards</i> .....	542
Standards, committee on.....	479, 575
Steam and water-power, comparative cost of.....	499
Steam engines, cost of power in.....	233
Steam hammer piston rods.....	820
<i>Steam turbine, note on</i> .....	680
Steel, case-hardening of.....	823
Steel phenomena.....	431
Steel for boilers.....	439
Steel for head shafts.....	435
Step pulleys, diameters of.....	269
STETSON, GEO. R., disc., phenomena of steel.....	435
